Office 54, Bldg 742, Road 831, Block 408, Sanabis, Kingdom of Bahrain

Proven by Character

ICON W.L.L is built around its customers with a foundation of innovation, responsiveness, and trust — delivering advanced technology solutions and standing strong to our core values of service, relationship, people-power, trust, and integrity.

Service	Relationship	People-Power	Trust	Integrity
Highest standard of workmanship and professionalism.	Long-lasting relationships and fairness with stakeholders.	We value and motivate every team member.	Trust and respect for successful project management.	Utmost integrity in every aspect of our work.

Our Leadership

Anish Mathew

General Manager

With over two decades of leadership across the ICT, telecommunications, and electronic security (ELV) industries in Bahrain and the wider Gulf, Anish brings a rare depth of hands-on and strategic experience to ICON W.L.L — progressing from technical and networking roles to senior operations, general management, and business development leadership. He holds a B.Tech in Engineering and an MBA in IT, and his experience is the foundation on which ICON's project delivery and client relationships are built.

Our Services

Access Control System

Manages who may enter or exit a premises, from simple standalone card readers to fully networked, expandable solutions with biometric readers and turnstiles.

Barriers

Automatic gate and boom barriers for high-traffic access points, with self-diagnosing units and Bluetooth-enabled control options.

CCTV System

Analog and IP-based surveillance solutions designed, installed, and maintained to deter crime and provide reliable evidence when needed.

Guest Room Management System

Turnkey hotel room control covering occupancy sensing, HVAC, lighting, curtains, and guest interfaces for a premium in-room experience.

Intercom

Audio and video door-entry systems ranging from single-door residential kits to advanced multi-entrance systems for high-rise buildings.

Lighting Control System

Architectural and daylight controls, dimmers, and occupancy sensors that improve energy efficiency and building security.

Public Address (PA) System

Amplifier, microphone, and speaker solutions for paging, background music, and EN-certified fire/EVAC life-safety announcements.

SMATV System

Cost-effective satellite/terrestrial TV distribution to multiple units via a shared coaxial network — ideal for communal properties.

ICT Solutions

Data centers, networking infrastructure, software development, and web-enabled services that keep your organisation connected and running smoothly.

Audio Visual System

HD conferencing, interactive whiteboards, digital signage, and integrated sound and video for boardrooms, retail spaces, and demonstration rooms.

Building Management System

Intelligent monitoring and control of HVAC, lighting, and other building services, with real-time performance tracking and fault alarming.

Fire Alarm System

Smoke and flame detection with intelligent signal processing to minimise false alarms, including voice evacuation for remote alerting.

Home Automation System

Single-app control of lighting, temperature, security, and entertainment, with flexible expansion as new devices are added.

IPTV System

Television delivered over Internet Protocol to TVs, PCs, tablets, and phones, with searchable, on-demand content.

Nurse Call System

Reliable, standardised patient-to-caregiver alerting with bed head consoles, call cords, and escalation across care facilities.

Parking Management System

Entry, exit, access, and payment control for parking areas, with optional pre-booking and traffic guidance.

Structured Cabling

Design and installation of voice and data cabling — UTP, F/UTP, STP, and fiber optic — for reliable network connectivity.

Burglar Alarm Systems

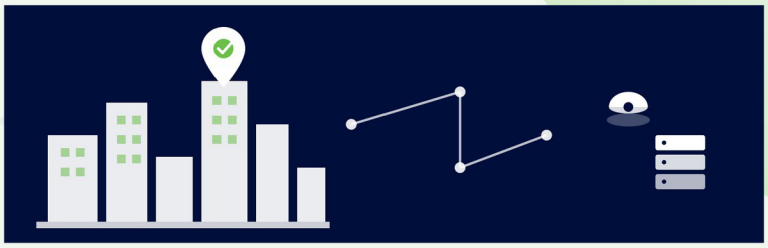

Intrusion detection solutions with motion sensors, door/window contacts, alarm panels and monitoring options to protect your premises and assets.
